LEONARDO STUART A. RAMALHO

SOFTWARE ENGINEER

leostuart05@gmail.com , +55 (31) 99624-6644 , Belo Horizonte, MG , linkedin.com/in/leonardo-stuart , github.com/leo-stuart

SUMMARY

Software Engineer focused on payment infrastructure, distributed systems, and AI integration, with production experience across fintech, consulting groups, e-commerce, and enterprise chatbot platforms. Proficient in Python, TypeScript and Go; expert in FastAPI, Node.js, Next.js, React, and MCP. Delivered measurable impact: R$ 591K+ in recovered revenue, 98% infrastructure cost reduction, and systems serving 60,000+ users.

EXPERIENCE

Software Engineering Intern Apr 2026 – Present

allu. Belo Horizonte

- Owned payment infrastructure projects for a highly-scaled platform processing millions of reais monthly across a 60K+ customer base, ensuring reliability for critical financial flows
- Built a cost-efficient failed-charge retry system using Supabase Edge Functions as a serverless worker, batch-processing transactions from a PostgreSQL-backed queue, recovering R$ 591.791,91 in a single month without added infrastructure cost
- Architected a proprietary whitelabel payment gateway with multi-tenant isolation, real-time webhook-based event delivery, and full white-label customization, enabling expandable payment infrastructure across multiple client-facing products

Software Engineering Intern Set 2025 – Apr 2026

dti Digital Belo Horizonte, MG

- Reduced context token consumption by 98% in MCP Server tool discovery by implementing MCP Optimizer, achieving infrastructure optimization for enterprise chatbot latency and API costs
- designed and migrated FastAPI chatbot infrastructure from legacy routing to Model Context Protocol (MCP) using JSON-RPC, ensuring expandable system architecture for production-level AI integration
- Built and deployed production features using FastAPI and MCP that improved daily workflows for 1,000+ users, leading projects to optimize internal operations and reduce manual task time

AI Engineering Intern Dec 2025 – May 2026

Magic Mango São Paulo, SP

- Automated lead generation and sales prospecting workflows using n8n and Python/Go scripts, reducing manual outreach time by 90% through process optimization
- Developed competitive analysis solutions for prospects, delivering practical market insights to support startup business strategies

Backend Developer May 2025 – Sep 2025

PUC COMP - Empresa Júnior Belo Horizonte, MG

- Developed and implemented strong microservices with Java Spring Boot for real-world client projects, focusing on expandable system architecture and enterprise-grade delivery
- Collaborated with multidisciplinary teams to translate business requirements into technical specifications, ensuring clean code alignment with client expectations

PROJECTS

Monity Jan 2025 – Dec 2025

Founder & Full-Stack Developer

- Founded and scaled personal finance app to 100+ users by developing AI integration for transaction categorization using machine learning, improving tracking accuracy by 80%
- Implemented comprehensive API optimization with intelligent caching and batch processing that reduced duplicate API calls by 70-90%
- designed and deployed cloud infrastructure on AWS using S3, CloudFront, and AWS CLI for automated deployments, achieving 99.9% uptime and supporting expandable growth
- Implemented CI/CD pipelines using GitHub Actions and automated deployment workflows, reducing deployment time from hours to minutes for continuous delivery

Behold Jun 2025 – Dec 2025

Co-founder & AI Engineer

- Built full-stack e-commerce automation including cart creation and shipping calculation, optimizing the customer journey to under 30 seconds
- designed a GraphQL integration system with MCP, resulting in 99% API reliability using Python FastAPI for complex Shopify operations
- Implemented a sophisticated AI integration using Google Agent Development Kit (ADK) with Gemini 2.0 Flash, processing 50+ simultaneous conversations with session-based state management

EDUCATION

PUC Minas 2025 – 2028

Bachelor of Computer Science

Expected graduation in 2028

SKILLS & AWARDS

Technical Skills: Python, TypeScript, JavaScript, Go, FastAPI, Node.js, React, AWS (S3, CloudFront, CLI), CI/CD (GitHub Actions), SQL, PostgreSQL, Redis, Docker, GraphQL, Model Context Protocol (MCP), JSON-RPC

Languages: English - C1 Level (Cambridge Certification), Portuguese - Native

Awards: 1st Place - Best Software Development Project (August 2025), 3rd Place - 3rd Unifecaf Hackathon (June 2025)
